

CORRECTION

Corrections of 'Multivariate Linear Discrimination When the Covariance Matrix is Unknown' by F. Streit, *South African Statist. J.* 13, 93-101, 1979.

On the fifth line of the proof of Lemma 4 on page 100, $\tau^{\frac{k}{4} + \mu - \frac{1}{2}}$ should be replaced by $\tau^{\frac{k}{4} + \mu - \frac{3}{2}}$. On this page -1 should be added to every argument of the functions Γ and F involving μ . The final result should read:

$$e(1:2) = e(2:1) = \{(2\pi) B[\frac{k-1}{2}, \frac{n-k+2}{2}]\}^{-1} \Gamma(\frac{n-k+3}{2})$$

$$\sum_{\mu=0}^{\infty} \left\{ \frac{2^{2\mu} \Gamma(\mu + \frac{1}{2}) \Gamma(\mu + \frac{k}{2} - \frac{1}{2})}{(2\mu)! \Gamma(\mu + \frac{n}{2} + 1)} \Gamma^*(\mu + \frac{1}{2}, \frac{\Delta}{8}) \right\}.$$
