

ACKNOWLEDGEMENT

PAPER BY SCHEMPER: GENERALIZED KRUSKAL-WALLIS TESTS
FOR COMPARING k SAMPLES SUBJECT TO CENSORING

The statistic H^B in the paper (South African Statist. J. (1983) 17, 1-11) has first been proposed by Lee and Desu (Computer Programs in Biomedicine (1972) 2, 315-321). However the former paper presents Kruskal-Wallis tests for censored data based on U-, Savage- or other scores, investigates their performance and discusses relationships to other tests.
